

Clyde and Fulmar CO₂ EOR | 2012

Talisman Energy

Customer: Commercial Director

Project phase: Appraise

Dundas scope: Economic model building
Economic evaluations and provision of advice
Project framing
Project governance support

PROJECT DESCRIPTION

Talisman Energy was an international energy company based in Canada with extensive oil and gas operations in the North Sea.

Talisman entered into an agreement to study taking CO₂ from a proposed CCS project in the Don Valley coal fired power plant in England and using it for an enhanced oil recovery scheme based on miscible gas flood offshore at its Clyde and Fulmar fields.

Talisman retained Dundas consultants Ltd to provide advisory support through a one year period of Appraise studies.

DUNDAS ROLE

Dundas assisted with a multi-discipline team effort including:

- Origination of the economic model including the Government subsidy frameworks
- Economic modelling work to meet specific requirements of Talisman HQ Investment Memorandum
- Economic evaluations
- Project framing facilitation (project management)
- Production modelling
- Project governance support

Clear recommendations were made to Talisman senior management in formal written reports and summary presentations.
